

**Web3 Decision**  
AI-Powered Audit, KYC & Business Vetting

Fast, Secure, Science-Driven Verification for Web3 Projects  
Created by Blockchain and AI Science Experts

# Introduction

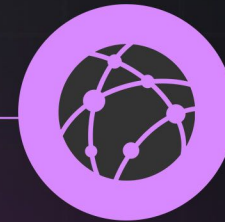

Web3 Decision introduces Logic-Based AI to revolutionize project verification in Web3. We provide instant, accurate, and automated auditing, KYC, and business vetting for projects looking to launch securely and transparently

Get results in under 1  
minute for all services

Fully decentralized and  
secure, eliminating  
human bias.

300 USD worth of Web3D  
token per service,  
enabling frictionless  
adoption.

# Why Logic-Based AI?

Traditional AI systems lack explainability and consistency—they often hallucinate, give incomplete analyses, or lack proof-based inference. Web3 Decision's Logic-Based AI ensures

- **Knowhow validation** – Verifies technical claims with logic-driven reasoning.
- **Inference proofs** – Every review is backed by verifiable logical steps.
- **Security & Compliance** – Enhances regulatory and business credibility.
- **Automation & Scalability** – No manual intervention, reducing costs and fraud risks

# The Core DApps

## AI Audit

- Smart contract security checks under 1 minute.
- Identifies vulnerabilities, exploits, and compliance risks.
- Fees: 300 USD (in Web3D token)
