1. COST EFFICIENCY

Discounted Fees: Projects that pay for services using **\$Web3D** tokens receive up to **30% discounts** compared to paying with other cryptocurrencies. This can reduce overall costs, making launching and managing projects on BlendPad more economical.

2. COMPREHENSIVE SERVICE SUITE

All-in-One Platform: Web3Decision offers various services necessary for project launches, including token creation, Staking, Locking, AI auditing, and KYC. Using \$Web3D tokens to access these services ensures that projects can manage all their needs in one place, simplifying the process.

3. AI-BASED SERVICES

Advanced AI Technology: Web3 Decision leverages cutting-edge AI technology for automatic smart contract auditing, KYC verification, decentralization, business analysis, and more. These AI-driven services enhance security, efficiency, and reliability, helping projects meet industry standards and build trust with their community and investors.

WEB3 POWERED BY THE SCIENCE OF ARTIFICIAL INTELLIGENCE

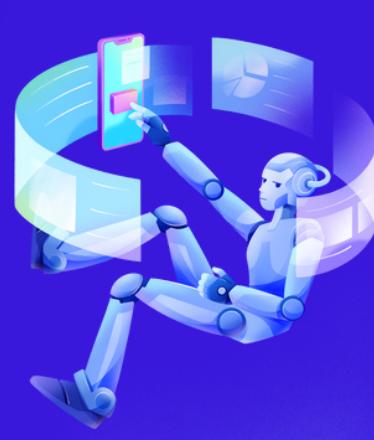

4. COMMUNITY AND VISIBILITY

Community Support: Projects using Web3 Decision services benefit from the platform's strong community engagement. The community heroes naturally support all projects, boosting visibility in the blockchain and social media world, and maximizing the project's reach and potential success.

5. SECURE ENVIRONMENT

Enhanced Security: By using AI-based auditing and KYC services, projects ensure that their smart contracts are secure and comply with best practices and that their investor base is verified. This fosters a secure environment, increasing investor confidence and project credibility.

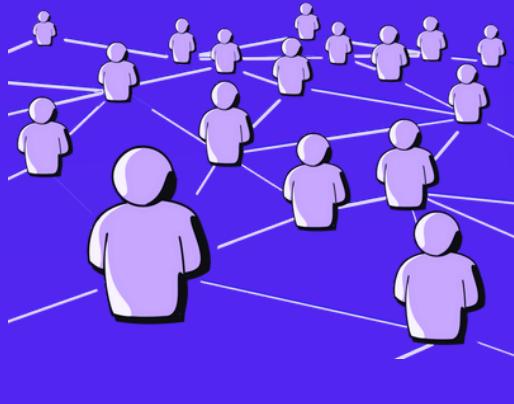

6. SPEED AND CONVENIENCE

One-Click Services: Web3Decision's platform is designed to be user-friendly with one-click options for various services. This ease of use accelerates the process of launching and managing projects, allowing project owners to focus more on development and growth rather than administrative tasks.

7. TRANSPARENT GOVERNANCE

Trust and Transparency: Web3Decision's transparent governance structure ensures that all actions and decisions are clear and open to scrutiny. Projects benefit from this transparency, as it builds trust within the community and among investors.

9. REFERRAL AND NETWORK EFFECTS

Referral Benefits: Projects that attract referrals to Web3Decision can benefit from network effects, as more users and projects join the platform. This can enhance the ecosystem, leading to greater collaboration and opportunities for growth.

10. PROFESSIONAL EXCHANGE LISTINGS

Exchange Support: Web3 Decision provides services for professional CEX listings, helping projects get listed on major exchanges. This increases the project's visibility and accessibility to a broader investor base.
